ON

[En] > When the lighting fixtures is off, the surface of the silkscreened glass diffuser looks like an even white surface, and you can see only the outlines of the floral decoration. When on, the surface is alive with different color shades, due to the number of silkscreen layers. Along the outline of the decoration, the light is clearer because there is less color; instead towards the center, where there is more color, the intensity of light decreases.

OFF

[It] > La superficie serigrafata del diffusore in vetro piano, quando la lampada è spenta, si presenta come una superficie omogenea bianca in cui si notano solo i contorni del decoro floreale. Con la luce, la superficie si anima di diverse tonalità determinate dalla quantità di strati di serigrafia. Lungo il perimetro, la luce è più chiara poichè minore è l'apporto di colore, mentre verso il centro, dove questo è maggiore, diminuisce l'intensità luminosa.

# EASY

design Massimo Tonetto

UNTIL STOCKS ARE EXHAUSTED/  
FINO AD ESAURIMENTO SCORTE

## [En] > Suspended light.

Simplicity and essential look are interpreted by the simple gesture of fitting a lamp in a lampholder, EASY is in fact made of 3 simple elements:

### **lamp, lampholder and metallic diffuser.**

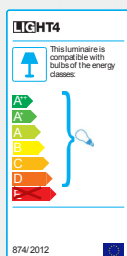

This last component rests on the light source reflecting downwards, greatly reducing the possibility of glare. The lamp is suspended from the power feed which is dressed with a braided cover of the same color of the lampholder and diffuser, the shape of the diffuser is reflected in the ceiling canopy.

## [It] > Luce sospesa

Semplicità ed essenzialità si traducono nel semplice gesto di avvitare una lampadina, EASY infatti si compone di soli tre elementi:

### **lampadina, portalampada e diffusore in metallo.**

Quest'ultimo, grazie al suo foro centrale viene appoggiato sulla sorgente luminosa consentendo la riflessione della luce verso il basso impedendo l'abbagliamento frontale. La lampada è sorretta dal cavo di alimentazione rivestito in tessuto dello stesso colore del portalampada e del diffusore, la cui forma si ritrova in posizione specchiata nel rosone.

LED 220-240V  
 120V for NORTH AMERICA

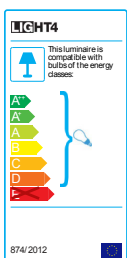

[En] > **Cone of light.**

The slow process of transformation of a tubular metal section to a slim and tapered cone, seems to attribute to the light-source the act of freezing the beam of light into a solid object. The accurate perfection of the surface, the specific weight and substance of the material, in contrast with the apparent fragility of the product, testify the value of the workmanship, all made in Italy. Last but not least, the varying color options, give the product an elegant and contemporary character.

[It] > **Cono di luce**

Il lento processo di trasformazione di un elemento tubolare in ferro in un cono dalla forma affusolata e snella, sembra voler attribuire alla luce l'atto di aver congelato e reso solido un fascio luminoso. L'accurata levigatezza della superficie, il peso specifico e la sostanza del materiale, in contrasto con l'apparente esilità dell'oggetto, testimoniano il grande valore della lavorazione rigorosamente made in Italy. Infine, la svariata gamma di colorazioni, in cui è disponibile la lampada, ne conferisce un carattere elegante e contemporaneo.

# JAM

design Andrea Lazzari

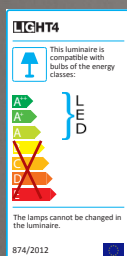

## [En] > Braidings of light.

JAM is a suspension lamp characterised by a metal dome enriched by a complex laser cutted ornament. The contrast between the decorated dome and the minimal superior cone creates an aesthetic balance. The light source is located inside the cone shaped element giving the light fixture a minimal aspect without any technical elements visible. The fixture is suspended with 3 steel wires.

## [It] > Intrecci di luce.

JAM è una sospensione composta da un paralume a fasce di metallo realizzato con la tecnica del laser 3D, che dona precisione al movimento delle curve, sovrapposto da un tronco di cono che gli dona stabilità, creando delle geometrie ornamentali. La fonte luminosa è nascosta nella parte superiore, realizzando un interessante contrasto tra vuoti e pieni. La lampada è sostenuta da tre cavi in acciaio che ne permettono la regolazione in altezza.

label **A**

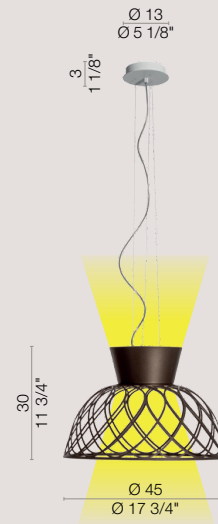

**JAMSO30BC** (white) € 392,00

**JAMSO30BR** (bronze) € 392,00

**JAMSO45BC** (white) € 548,00

**JAMSO45BR** (bronze) € 548,00

[En] > The JAM SO Ø45 has double light emission allowing the customer to choose whether to use the direct light source downwards, the indirect light source upwards or both. This feature adds another point to the exclusivity of the product.

[It] > Sono molteplici le possibilità di utilizzo della lampada JAM, la cui fonte luminosa può essere utilizzata a scelta verso il basso o verso l'alto, oppure usufruendo della doppia accensione, donando al prodotto un carattere ancor più volubile e prezioso.

# RING

design L4B

[En] > A continuous circle of light.  
The upper and lower diffusers in PMMA are completely without any fixing elements which allows the light emission to be perfectly continuous.  
This is possible thanks to an innovative construction of the section of the lamp which unites the two sides through an internal metal bracket.  
The same bracket supports the light source which is integrated in a silicone body allowing the light emission to be completely uniform.  
The lamp has a double light emission.

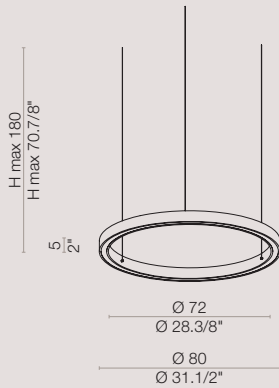

[It] > I diffusori, inferiore e superiore, sono in PMMA opalino.  
Il flusso luminoso continuo è ottenuto grazie all'assenza di elementi di fissaggio e ad una costruzione innovativa del profilo della lampada che unisce le due pareti in metallo attraverso una staffa anch'essa in metallo.  
La stessa staffa, poi, sostiene la sorgente luminosa che è inserita in un involucro di silicone.  
In tal modo si elimina la puntinatura dello strip LED e si ottiene una luce perfettamente uniforme.  
La lampada ha emissione luminosa sia verso l'alto che verso il basso.

### [En] > BI-emission lighting.

The constructive principle of the lamp allows a double light emission.

This detail makes the product capable of illuminating the surrounding space with a 360 degrees light.

The upper and lower light emission are equal both for what concerns quantity and colour giving a completely homogeneous effect.

### [It] > BI-emissione luminosa

Il principio costruttivo delle lampade rende possibile una doppia emissione luminosa:

in tal modo l'ambiente circostante viene illuminato a 360 gradi.

Inoltre, la luce orientata verso l'alto e verso il basso è uguale sia per quantità che per colore al fine di rendere il flusso di luce completamente omogeneo.

# SMOKE

design Massimo Tonetto

UNTIL STOCKS ARE EXHAUSTED/  
FINO AD ESAURIMENTO SCORTE

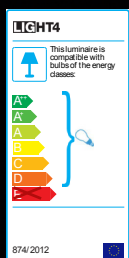

## [En] > Overlapping.

The apparently casual juxtapositioning of formless shapes gives birth to SMOKE. Sheets of white glass overlap, giving an interesting play of light and darkness that are appraised by the reflective surfaces of the diffusers. They are presented as independent elements and can be matched up in different positions opposite each other, creating a variety of shapes.

## [It] > Sovrapposizione

La giustapposizione apparentemente casuale di forme amorphe, dà vita a SMOKE. Lastre di vetro bianco si sovrappongono creando interessanti giochi di chiaro-scuro che sono valorizzati dalle superfici riflettenti dei diffusori.

Essi si presentano come elementi indipendenti che possono essere accostati l'uno di fronte all'altro in diverse posizioni, rendendo possibili molteplici variazioni formali.
