Verner Panton.

Verner Panton

Verner Panton

(1926 -1998)

Among the giants of Danish design, Verner Panton established a unique reputation for his exuberant originality and tireless experimentation. Panton created lamps, furniture and textiles – and was also a sought-after interior designer. Although he was at the forefront of mid-century Danish Modern, Panton’s contribution was anything but mainstream. He enthusiastically embraced new materials, he splashed with a bold colour palette, and he playfully imbued many of his sculptural creations with a strong graphical expression – without ever compromising on quality or workmanship.

Panton’s iconic designs have emerged as contemporary design classics – as strikingly inventive now as they were 50 years ago.

Panton’s interior installations have attained legendary status. The most famous examples are the ‘Visiona’ ship installations for the Cologne Furniture Fair (1968 and 1970), the Spiegel publishing headquarters in Hamburg (1969) and the Varna restaurant in Aarhus (1971).

Verner Panton in his own words:

“The main purpose of my work is to provoke people into using their imagination. Most people spend their lives living in dreary, grey-beige conformity, mortally afraid of using colours. By experimenting with lighting, colours, textiles and furniture and utilizing the latest technologies, I try to show new ways, to encourage people to use their imagination and make their surroundings more exciting”.

Moon.

MOON
small
pendant

Diameter: 34 cm.

Spherical pendant made of vertical metal lamellae, arranged like a fan, for individual regulation of the light. Mounted with a ceiling canopy with the same finish as the lamellae.

Available in white and orange.

Introducing orange.

Bold and playful in nature, the colour orange remains a constant source of creativity and vitality. With a wealth of warmth, it introduces change and symbolize new beginnings. It marks the inevitable changing of the seasons and gracefully leave its audience with the powerful reminder to take pleasure in and reflect on the many wonders of life.

The colour's subtle touch of humour made it one of Verner Panton's favourite choices, making it a natural choice for the popular Moon.

The Moon pendant is one of Panton's earliest light fixture designs, dating back to 1960. The spherical pendant is made up of vertical metal lamellae, arranged like a fan, for individual regulation of the light.

MOON
large
pendant

Diameter: 44.5 cm.

Spherical pendant made of vertical metal lamellae, arranged like a fan, for individual regulation of the light. Mounted with a ceiling canopy with the same finish as the lamp.

Available in white.

FUN 11DM
brass finish
pendant

Height: 44 cm. Diameter: 70 cm.

Pendant with seashell discs on a five ring metal frame with brass finish. Mounted with a brass finish plated ceiling canopy.

The masterpiece.

Regarded as one of Verner Panton's greatest masterpieces within lighting design, the Fun collection was born from Panton's desire to create a lamp that would function both as a light source and an interior sculpture.

Fun in brass finish builds on the existing Fun collection. The brass finishing adds a warm glow, which in combination with the natural seashells create a beautiful and elegant design that perfectly reflects and spread light in interesting, diffuse cascades.

About.

Verpan

est. 2003

Verpan is - much like Verner Panton - a product of the Danish design tradition, which have put Denmark on the world map for functional, modern and unique design.

In close collaboration with the Panton estate - especially widow Marianne Panton - Verpan has acquired the production and sales rights to a significant part of Verner Panton's designs. In 2003, the production of lighting was initiated and in 2010 a furniture range was added. A continuous process of picking and choosing products from the vast treasure chest of Panton's work, will bring many more items to life again.

All of the Verpan products stand out as some of the most elegant and memorable of Verner Panton's designs.

Products that create life, sound, movement, colour and light - design that brings value into the visual world around us.
